IDENTIFIERS	*Michigan

ABSTRACT

Ratios and percentages derived from information submitted by Michigan's 29 community colleges are provided for fiscal year 1982-83. Section 1 presents tables showing instructional ratios and percentages, including data on enrollments by college by instructional category; the state's prison population; course contact/credit hour ratios by instructional categories; and state average headcount by instructional category. Section 2 presents personnel activity data, including the number of full-time equated positions by college, average compensation by college, and faculty percentages by instructional category. Section 3 contains information on total college revenues by college and revenue source; the history of state-equalized valuations by college; tuition charges by student credit hour; tuition rates by college; and 1982-83 general fund balance by college. Section 4 covers total college expenditures by activity by college; total instructional expenditures ranked by college; total operating expenditures by instructional categories; fringe benefits by college; general fund compensation by college; and student service costs per unduplicated headcount. Section 5 provides an activity classification structure report for 1982-83 which includes detailed information on courses, course sections, credit hours, student headcount, prisoner headcount, and headcount for instructional activities by college. A list of the state's community colleges and definitions of terms associated with the activity classification structure are appended. (HB)

INTRODUCTION

This Activities Classification Structure (ACS) Data Book is the second annual publication of ratios and percentages derived from information submitted by Michigan's twenty-nine community colleges. The annual community college appropriations act assigns primary responsibility for data collection to the Michigan Department of Education. Act 419, P.A. 1978, mandated the development of the current data base, which is required to be fully compatible with the Michigan Manual for Uniform Financial Reporting.

Section II of this document displays new information on personnel. One should note that these data -- and all other information within the document -- reflect only general fund activities, unless specifically noted. A review panel chaired by Department of Education personnel continues to meet periodically to fine-tune the data and to address related emerging issues.

One should be aware of specifics regarding enrollment data in this report. Table 1 displays a six-year history of fiscal year equated students (FYES), but only the last two fiscal years include all general fund FYES which were generated at each college. Beginning with FY 1976-77 and continuing through FY 1980-81, the state appropriations act required that FYES generated in avocational/leisure courses be excluded from state enrollment reports and from state funding. Consequently, between 2,000 and 3,000 FYES were excluded from the enrollment reports each year. Commencing with ACS reporting for FY 1981-82, all general fund FYES have been included in the enrollment report of each community college. Individuals studying this Data Book should also be aware that credit hours have been semester-equated for those colleges operating on an academic term basis.

Table 2 displays funded enrollment figures for the colleges, representing the FYES used to generate state aid for each fiscal year. Noticeably, until FY 1982-83, the numbers correspond exactly to the prior year enrollments displayed in Table 1. The reason for this is that the Legislature chose in 1978 to begin using prior year enrollments for state aid appropriations. Typically, the Legislature would estimate the final FYES figures for the prior year when making appropriations, and make provision for state aid adjustments after audits were completed on the enrollment reports.

As is apparent, the ACS reports of enrollment for FY 1981-82 and FY 1982-83 differ from the estimates used to generate state appropriations. Since no state aid adjustments were required by law for those years, the funded enrollments remain different from actual FYES. The substantial difference between funded enrollment for FY 1982-83 and actual prior year FYES is the result of personnel at many colleges not understanding, at the time that appropriations were enacted, that all instructional FYES -- as defined by ACS -- were to have been reported.

Hopefully, the information in this report will be useful to state decisionmakers, college administrators and the general public. Certain ACS definitions and miscellaneous relevant information are contained within the appendix; the Michigan Community Colleges Activities Classification Structure Task Force Final Report (July 1981) may be consulted for additional definitions. Questions concerning data interpretation may be directed to either Mr. Ron Root or Dr. Loretta L. Grobe.

*By definition, a semester credit hour must not be less than 800 instructional minutes. Since one course contact hour is 50 minutes of student instruction, a minimum of 16 course contact hours is necessary to generate one semester credit hour. A ratio of 1.00 (or 1:1) indicates that the minimum instructional time exists for that instructional activity.

STATE-TOTAL					

---

[1] State aid revenue within the college fiscal year; state categoricals such as the Job Training and Retraining Investment Fund are restricted funds which are not included in this amount.

[2] Total general fund revenue minus state aid, tuition and tax revenue.

Activity Definitions

(1.0) INSTRUCTION

The Instruction Activity includes those activities carried out for the expressed purpose of eliciting some measure of educational change in a learner or group of learners. "Educational change" is defined to include (1) the acquisition or improved understanding of some portion of a body of knowledge; (2) the adoption of new or different attitudes, and (3) the acquisition or measured mastery of a skill or set of skills. The activities that may be carried out to elicit these educational changes include both teaching activities and facilitating activities. The instruction activity includes both credit and non-credit instructional offerings.

Course offerings should be classified into element classifications on a course level. The determination of the classification of instructional offerings into activity elements is based upon the basic and primary institutional reason for offering the courses. Briefly stated, the Activities Classification Structure recommends defining activity elements on the basis of an aggregation of groups of courses of similar subject matter rather than on the basis of the aggregation of instructional offerings that can be applied toward a particular degree or certificate, or what is commonly called a program.

Thus, the subject matter of any course activity determines its element classification.

Instructional offerings in which previously acquired skills or knowledge are used in a specific and exclusive application are defined as applied courses (activities). The subject matter of the area of application determines the classification of applied courses. Applied courses are differentiated from courses in which the learner acquires such basic knowledge or skill, which are classified in that activity element reflecting the basic knowledge or skill area. For example, a business communications course is classified as "communications" (Activity Element 1.12) when the skill to be mastered is primarily communications and not business subject matter.

(3.0) PUBLIC SERVICE ACTIVITY

The Public Service Activity includes those program activities established to make available to the public the various unique resources and capabilities of the institution for the specific purpose of responding to a community need or solving a community problem. This program includes the provision of institutional facilities, as well as those services of the faculty and staff that are made available outside the context of the institution's regular instructional program.

(4.0) INSTRUCTIONAL SUPPORT ACTIVITY

The Instructional Support Activity includes those activities carried out in direct support of the Instructional program. The activities that should be reported in this activity classification include (1) activities related to the preservation, maintenance, and display of both the stock of knowledge and educational materials (for example, library services and museums); (2) activities that directly contribute to the way in which instruction is delivered; and (3) activities directly related to the administration of instructional programs.

The activities that should be classified in the Instructional Support Activity differ from those classified in the other support programs in that they are carried out in direct support of the Instruction program. While some activities of the Student Service program may contribute indirectly to the institution's instructional objectives, they are generally considered to be a supplement to the Instruction program rather than a direct contributor to its objectives. The Institutional Support Activity, on the other hand, is primarily concerned with the institution as an operating entity and tends to focus on the institution as a whole rather than upon individual programs.

(5.0) STUDENT SERVICE ACTIVITY

The Student Service Activity includes those activities carried out with the objective of contributing to the emotional and physical well-being of the students, as well as to their intellectual, cultural, and social development outside the context of the institution's regular instruction program. Activities classified here attempt to achieve this objective by (1) expanding the dimensions of the student educational and social development of providing cultural, social, and athletic experience; (2) providing those services and conveniences needed by students as members of a student body; (3) assisting students in dealing with personal problems and relationships, as well as their transition from student to member of the labor force; (4) administering a program of financial support for students; and (5) recruiting and admitting students to the institution's educational program.

(6.0) INSTITUTIONAL ADMINISTRATION ACTIVITY

The Institutional Administration Activity consists of those activities carried out to provide for both the day-to-day functioning and the long-range viability of the institution as an operating organization. The overall objective of the Institutional Administration Activity is to provide for the institution's organizational effectiveness and continuity. It does this by (1) providing for planning and executive direction, (2) providing for administrative and logistical services, and (3) enhancing relationships with the institution's constituencies.

(7.0) PHYSICAL PLANT OPERATIONS ACTIVITY

The Physical Plant Operations Activity consists of those activities related to maintaining existing grounds and facilities, providing utility services, planning and designing future plant expansion and modifications, and health and safety services.

MICHIGAN STATE BOARD OF EDUCATION
STATEMENT OF ASSURANCE OF COMPLIANCE WITH FEDERAL LAW

The Michigan State Board of Education complies with all Federal laws and regulations prohibiting discrimination and with all requirements and regulations of the U.S. Department of Education. It is the policy of the Michigan State Board of Education that no person on the basis of race, color, religion, national origin or ancestry, age, sex, marital status or handicap shall be discriminated against, excluded from participation in, denied the benefits of or otherwise be subjected to discrimination in any program or activity for which it is responsible or for which it receives financial assistance from the U.S. Department of Education.
